SILMAR GROUP

The Group was founded in 1970, from the vision and strategy of Mr. Silvestro Niboli, who focused on diversifying production and set the very high standards of quality that would be adopted by each of the companies he built.

Silmar Group was established with the mindset of a modern industrial group, ready to compete with markets across the world.

The companies of the Group, interconnected by a clear vision, today represent one of the most important international players in the Italian industry: Silmar Group has its eye on the future within a framework of steady growth, confirming the powerful synergy of its member companies.

Silmar Group in numbers in 2022:

Fondital is the world's leading manufacturer of aluminum radiators, an international leader in heating systems and a manufacturer of structural castings for the automotive industry.

Raffmetal is Europe's largest manufacturer of recycled aluminium alloys. With an annual production capacity of over 350,000 tons/year and plants in Valle Sabbia, in the province of Brescia, the company is able to meet the requirements of international customers operating in different industrial sectors.

Valsir was founded in Valle Sabbia in 1987, providing advanced solutions for the plumbing and heating sector. Valsir is a leading industrial company, which through a dense network of subsidiaries and affiliated companies competes as a major player in markets all over the world.

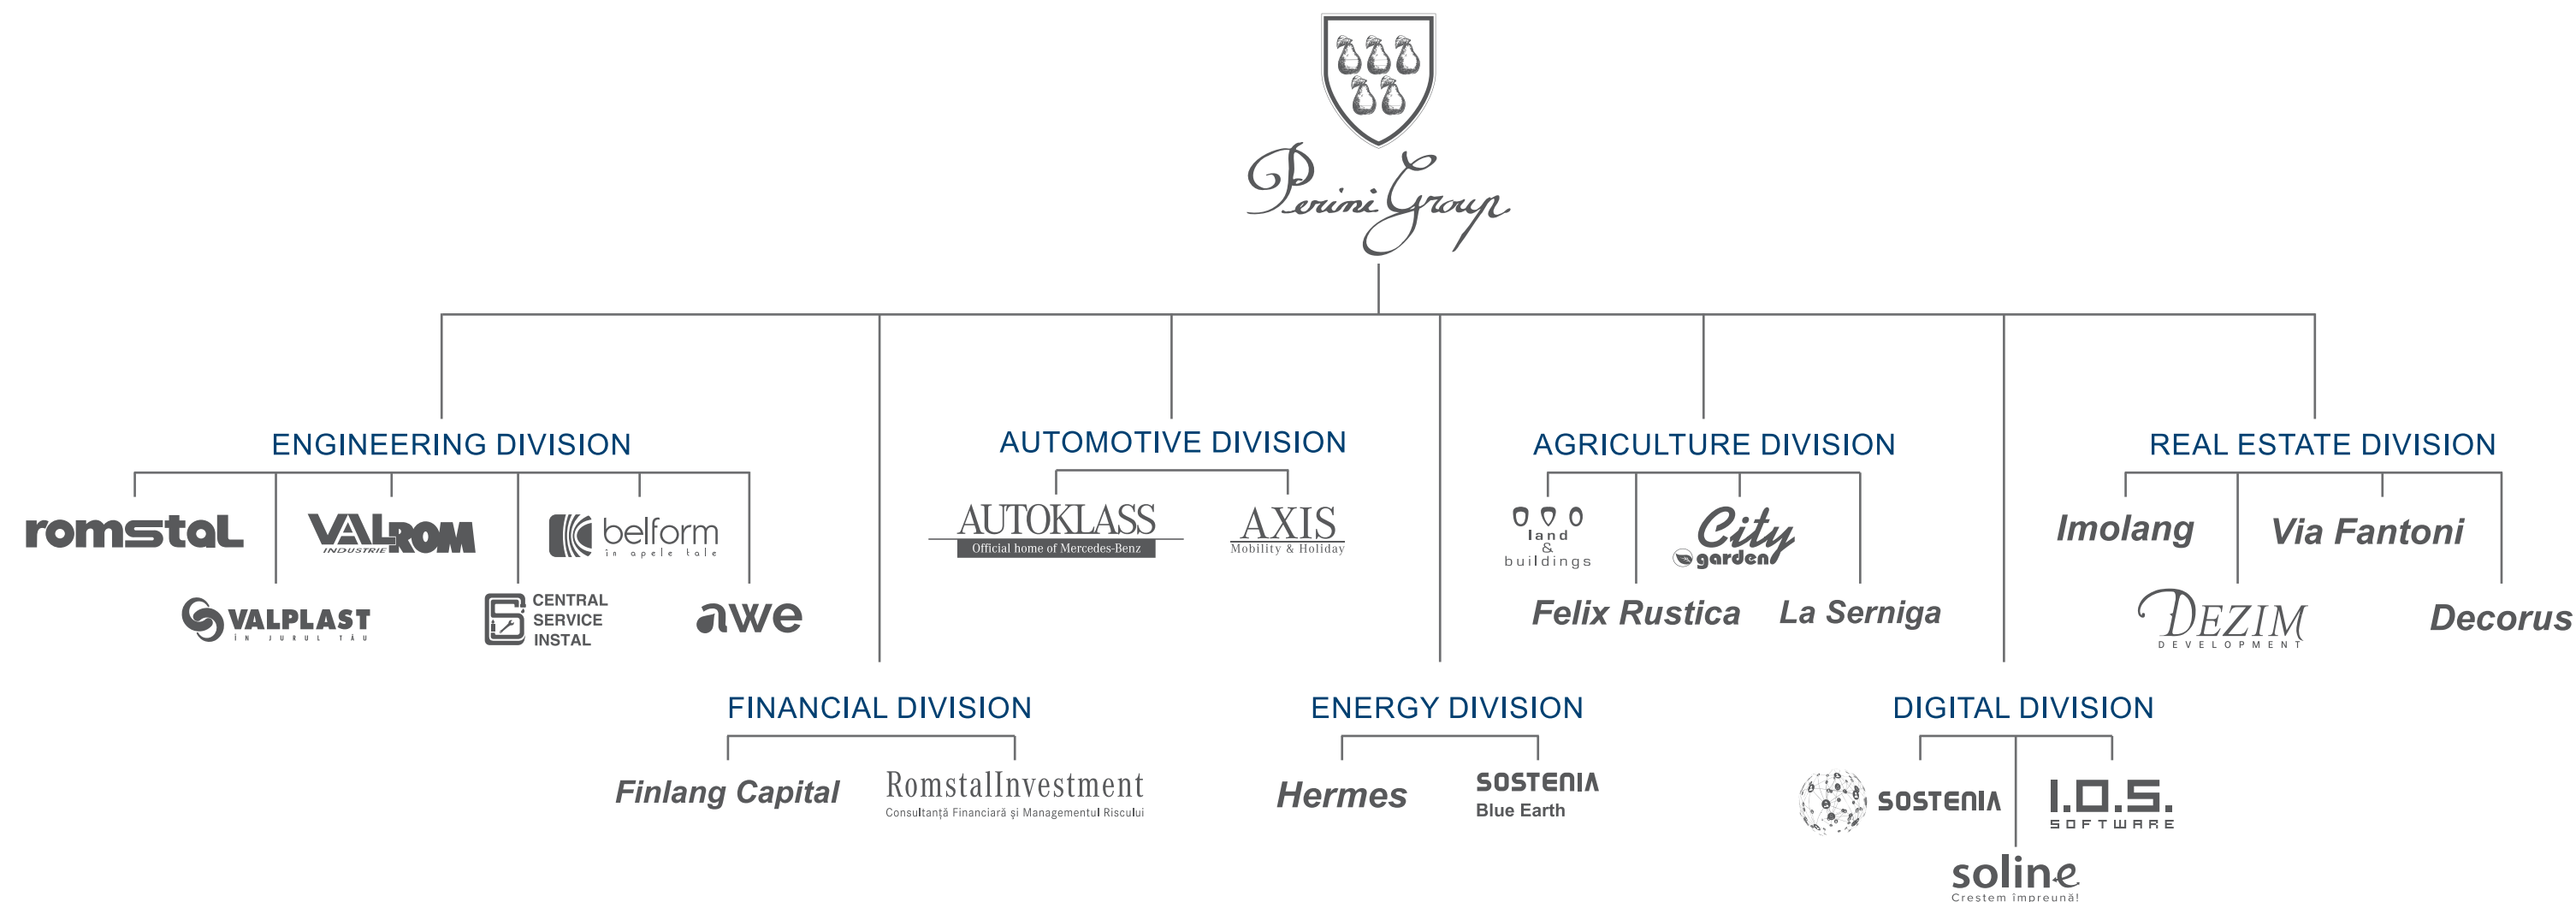

Marvon S.r.l. was founded in 1967 and has gone through 50 years of industrial history, interpreting the requirements of an ever-evolving economy. Production of firestop doors handles and intumescent seals and accessories for doors producers.

Nibofin S.r.l., the real estate branch of Silmar Group, aims to buy and increase the value of real estate in the medium and long term.

romstal

Romstal is the most dynamic and important company on the Romanian market in selling construction equipment installations. The company offers over 50,900 products, characterized by globally recognized quality, which Romstal is adopting as a market policy.

City Garden imports and distributes of indoor & outdoor plants, seeds, bulbs, flower beds, decorations, garden furniture, gardening machinery, irrigation systems, as well as landscape design services.

AUTOKLASS

AUTOKLASS CENTER is a Romanian company, specialized in selling Mercedes-Benz passenger cars and light commercial vehicles, as well as in providing after sales services, according to the standards of the represented brands. Starting 2011, four of our branches acquired the qualifications to become Honda Authorised Sales and After Sales Centers.

Sostenia is a specialized software company focused on enhancing business processes through Digital Transformation. In 2022, Sostenia was honored with the Best Starter Europe award from Odoo.

belform

Belform Prod SRL is a national producer of shower tubs, acrylic bathtubs (simple and whirlpool tubs) minipools, bathroom and interior furniture, metallic fabricates and performs various milling tasks with CNC machines. Established in 1992, Belform presently has 40 employees and a production capacity of 60.000 units annually.

Dezim Development & Imolang mission is to provide clients with a complete range of real estate services at the highest professional level. The company constantly invests in perfecting and widening the range of services, in order to offer clients optimal and professional solutions.

VALROM GROUP

In 1996, Valrom Industrie was born as a result of a strategic decision to help the Romanian infrastructure with complete solutions for water, gas, and sewerage networks.

Today, Valrom Group manufactures and markets pipes, fittings, and other plastic products (polyethylene and polypropylene), representing a solid regional presence in South-East Europe. As a distributor, Valrom Industrie has and maintains a loyal network of large customers, mainly in: Romania, Ukraine, the Republic of Moldova, Bulgaria and Greece.

Valrom combines economic operations with social responsibility, environmental protection and sustainable development in its work and constantly invests in research and development.

Valrom Group in numbers in 2022:

Surface
over 900,000 m²
and
6,000 ha in agriculture

Turnover
114,800,000

Direct employees
600

Valrom Industrie Romania is as a main manufacturer and distributor in the field of construction materials processes and integrates various raw materials, among which it prevails: plastics – PE, PP, PP-R, PEX and brass.

Valrom Ukraine produces pipes and fittings of own production from thermoplastic materials which are applied to water, gas supply, and also to the internal and external sewerage: PE , PP/PVC pipes and fittings for internal sewerage, including sound-absorbing system, PVC pipes, fittings and wells for external sewerage, mini-stations for wastewater treatment, etc.

Valplast Industrie produces a wide range of solutions out of PVC, plastic sewers, water well pipes, drain pipes, pressure pipes, pipes for protection of electrical and telecommunication cables and composite manhole covers.

land & buildings

Land & Buiding cultivates grains (exclusively rice), leguminous plants and plants which produce oil seeds.

Acquisition of agricultural terrains in Constanta County begins, around the following villages: Seimeni, Tortomanu, Crucea, Topalu, Pantelimon.

Valplast

The project is selected for funding in the spring of 2012 and the implementation was completed in the spring of 2015. Through this project were acquired agricultural machinery and irrigation system necessary for the cultivation of a surface of approximately 1.000 hectares.

ACCOMPLISHMENTS

The company now owns a surface of approximately 6000 ha of land of which 800 hectares are irrigated.

In 2016 was initiated an investment project for the establishment of a hazelnut and walnut plantation in an ecological system with an area of 19.92 hectares in the village of Seimeni and the project was presented for approval at the A.F.I.R authority, in order to obtain European garants.

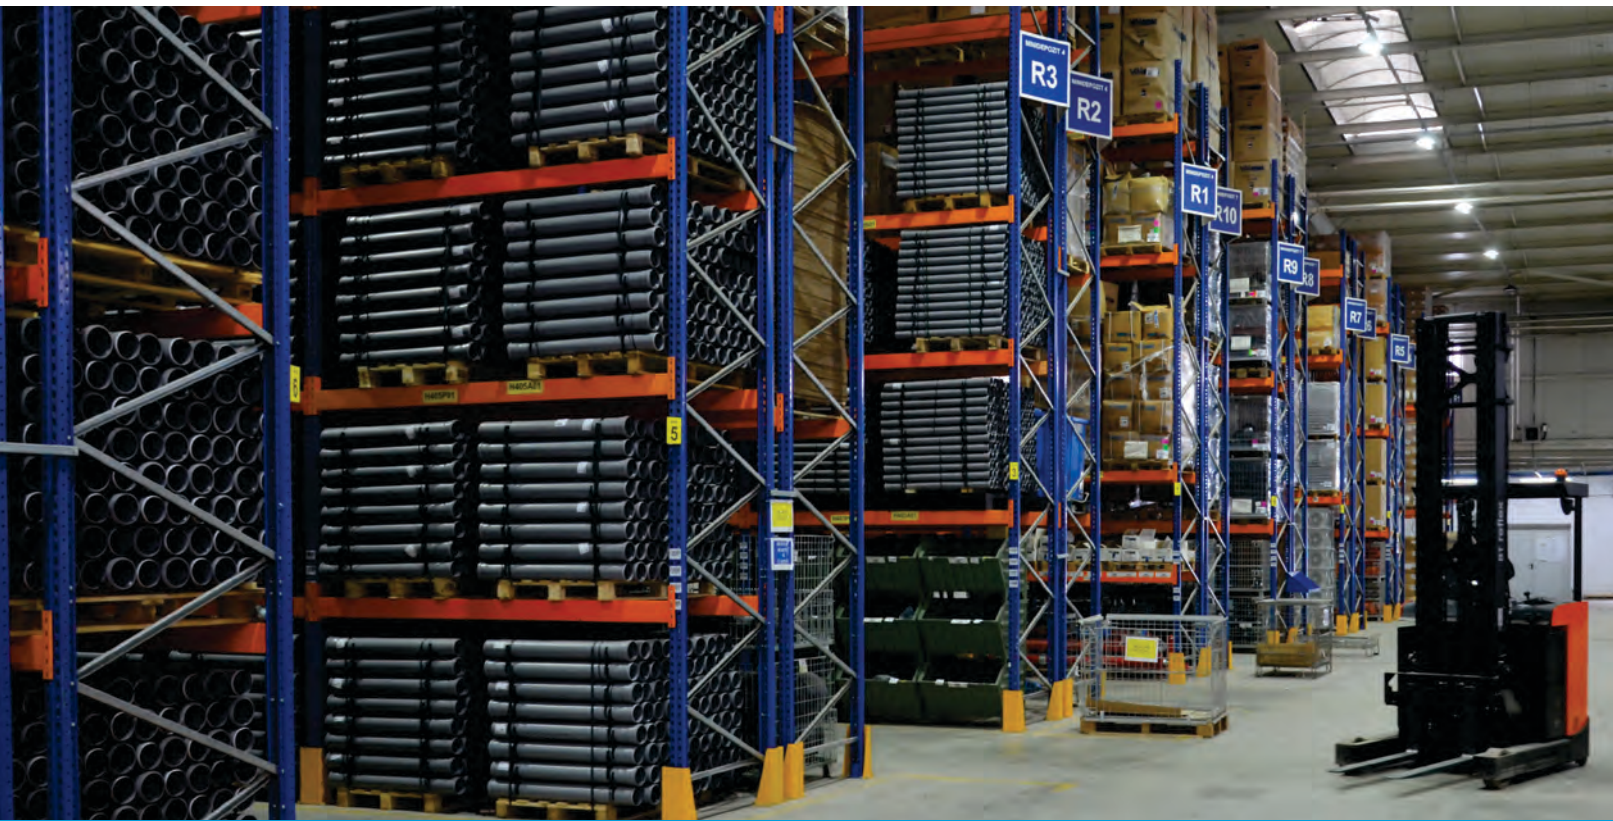

The project was selected for funding in 2017.

Turnover 2022: 2,800,000 euro

Employes: 20

Land & buildings

so sure

Quality is the core element in order to obtain successful Valrom products.

Each activity within the company involves planning, organizing, providing quality services, compliance with deadlines and ability to provide effective solutions.

so innovative

We offer our customers integrated solutions and systems.

We capitalize on the innovation capacity through the implementation of new ideas, together with effective technological processes, innovative design and finding smart solutions to solve classical problems.

over
27 years
of experience

It's easy when you're the partner of the leader.
It's very easy to be a professional
It's even easier to create complete systems
It's so simple. Enjoy Valrom's solutions

Valrom Industrie constantly invests in research and development, offering a solid partnership to its clients, designers, contractors, over 1,500 local and international distributors in over 18 countries from the European Union and around the world.

Export

+1,500 partners

Equipment: 17 extruding lines (5 quick switch lines)

Annual production capacity: 20.000 T/year

Raw material: PE, PP, PPR, PEX, PE-RT

Products:

- Piping for water supply systems
- Piping for irrigation systems
- Piping for gas supply systems
- Piping for internal sewage
- Piping for sanitary and heating systems

Size range: D14 - D1200 mm.

Extruding

17 extruding lines

2,100 extruded products

Equipment: 32 injection moulding machines

Raw materials: PP, PVC, PE, PPR

Annual production capacity: 1540 T/year

Products:

- PP internal sewage fittings
- PVC sewage fittings
- Water/Gas fittings and electro-fittings
- PPR fittings

Injection moulding

650 injected products

Pantelimon Factory - Rotomoulding has a surface of 2210 sq.m:

- 210 sq.m warehouse
- 2000 sq.m manufacturing and office facilities

Equipment: 3 rotomoulding machines

Raw material: PE

Annual production capacity: 2200 T/year

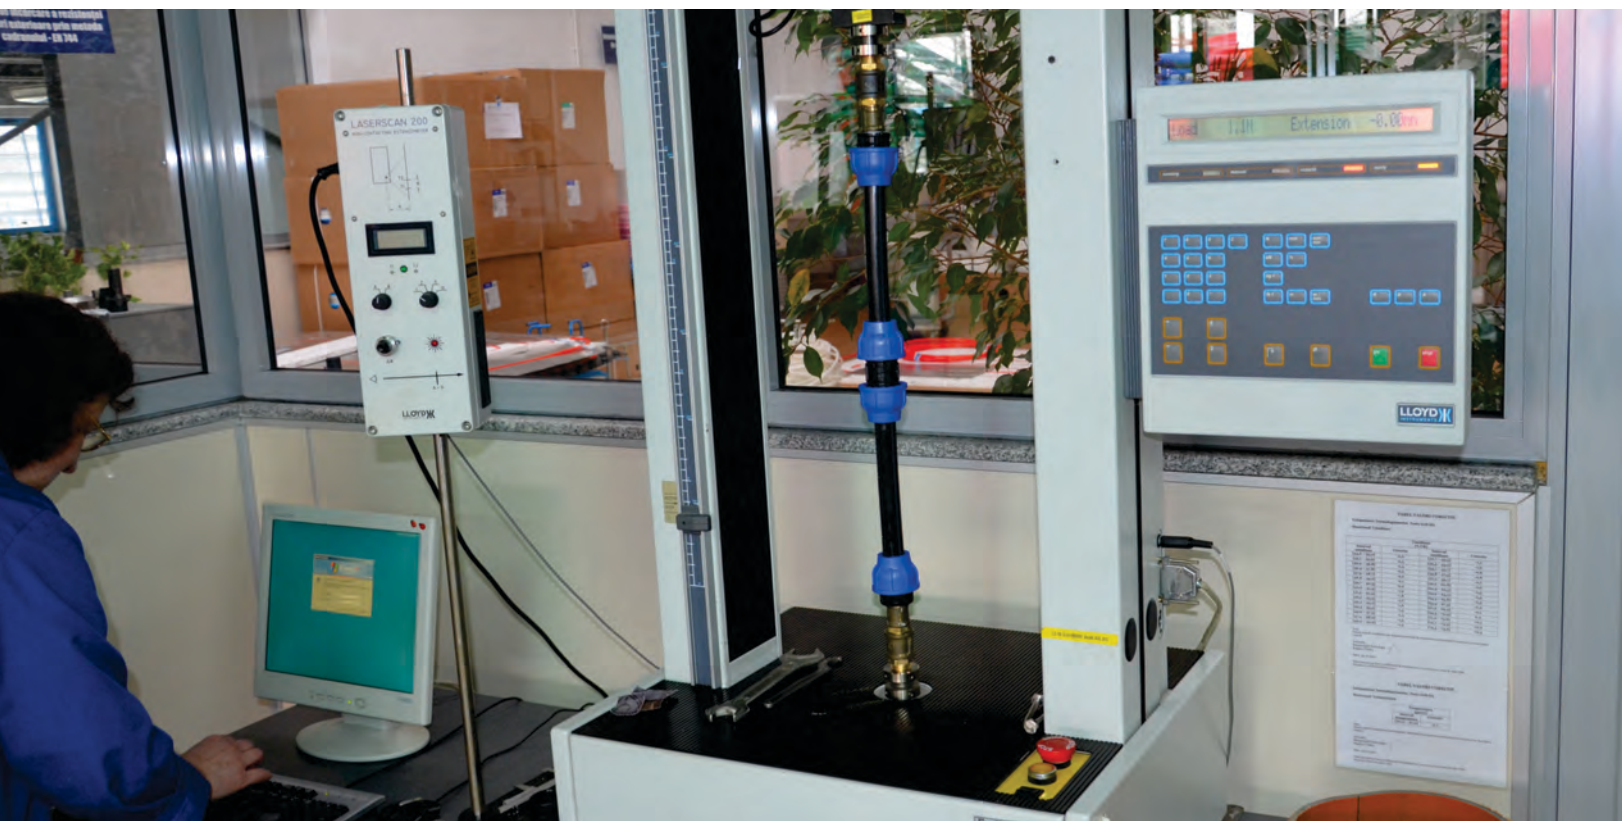

Products:

- Water Tanks
- Inspection and visit chambers
- Water meters chambers
- Well chambers
- Wastewater treatment plants

Rotomoulding

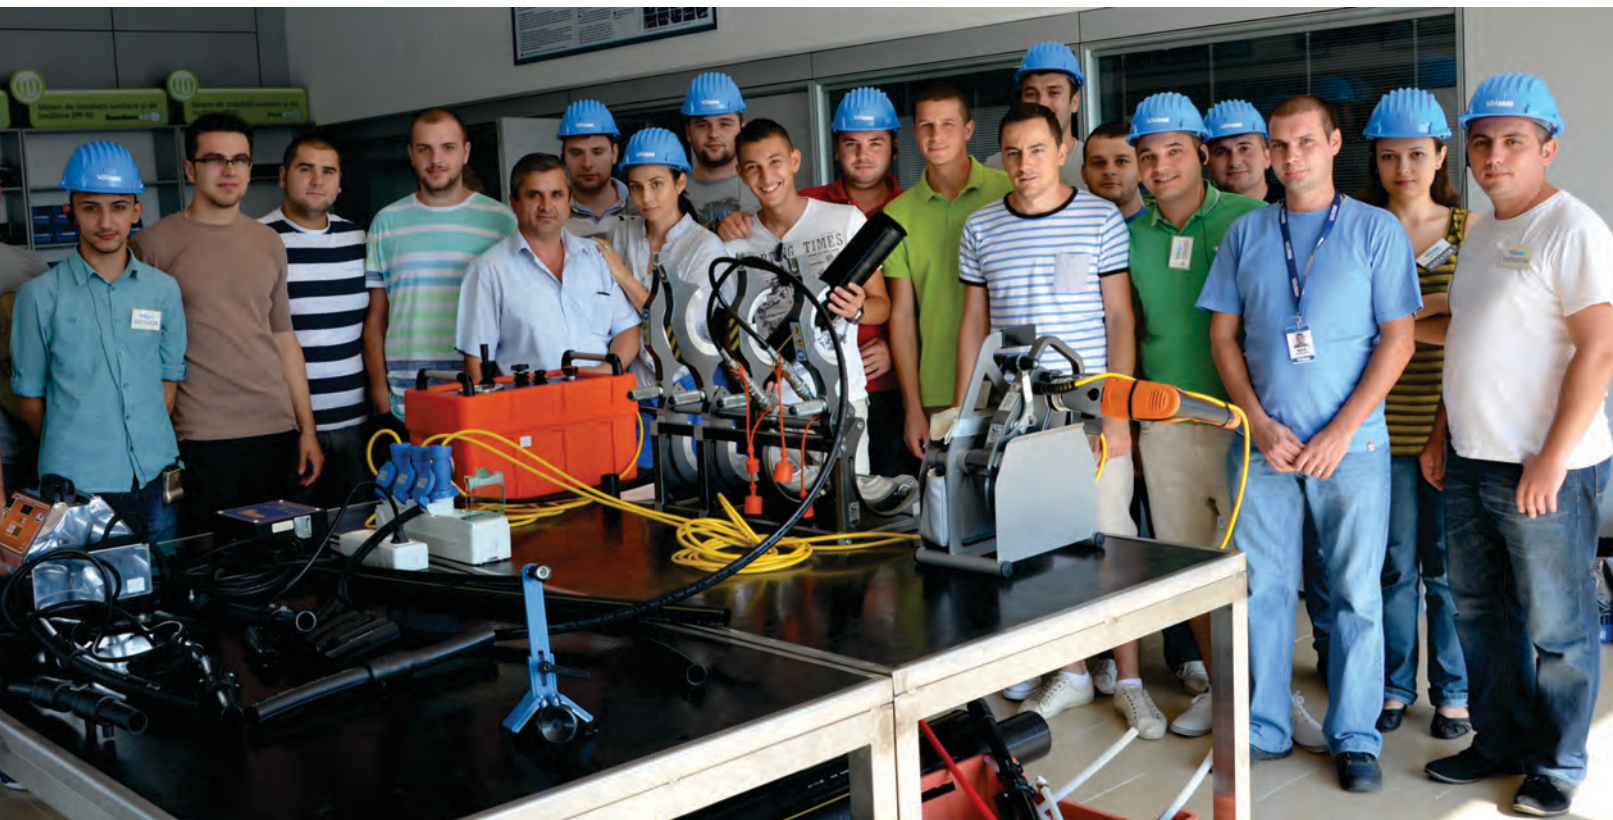

600 rotomoulding products

- Laboratory ensuring regular testing of raw materials and manufactured products
- Laboratory participates in the inter-laboratories testing scheme organized by the Institute for Chemistry and Technology Austria

Laboratory

Valrom - training center

- training and refresher courses for employees and collaborating companies
- technical courses for specialists from Valrom partner companies
- technical and commercial presentations of new products provided
- Presentation courses for students from specialized faculties

over
1,300 trainees
in one year

Valrom manufactures and sells:

- water and gas supply systems
- internal and external sewage systems
- filtration, water storage and pumping systems
- domestic wastewater treatment systems
- sanitary and heating systems

offering quality, safety and efficiency.

WaterKIT represents a complete system, designed for water distribution, irrigation and fire systems, consisting of HDPE pipes and fittings, water meter chambers.

Dimensions

HDPE pipes available diameters, between 20 and 1200 mm.

Depending on diameter and SDR, pipes are delivered in coils (length 100 m or 200 m) or in bars (length 13 m).

WaterKIT

GasKIT represents a complete system, designed for gas distribution.

Dimensions

HDPE pipes available diameters, between 32 and 1200 mm.

Pipes can be delivered in coils, having 100 or 200 m, for diameters up to 110 mm (included). Pipes can be delivered in 13 m bars, for upper diameters.

GasKIT

AgriKIT is a professional irrigation system consisting of pipes, fittings, valves and irrigation or sprinkler elements.

netLINE is a complete system designed to install and protect cables and fiber optics used in communications networks. It consists of chambers, PEHD and PVC cable protection tubes, PEHD microtubes, connectors.

aquaClean represents a complete system, used for precleaning and cleaning waste waters.

- quaClean – SBR waste water treatment plants for domestic applications
- aquaClean – septic tanks
- aquaClean – grease separators
- aquaClean – coalescing oil separators

Kompact sewage collectors. Polyethylene sewage collectors represent the ideal solution for an efficient sewage applicability.

aquaPur® is a POE (point-of-entry) drinkable water storage, filtering and pumping system for your home. aquaPur® uses the silver ions technique developed by Valrom in order to prevent microflora in the storage tank from expanding.

aquaPUR

StockKIT represents a complete system, used for liquid storage (water and/or other liquids for consumption). This tank can be also used as a buffer appliance.

EasyKIT is a system designed for waste water discharge inside buildings, consisting of polypropylene tubing and fittings. Valrom PP pipes and fittings are used for:

- waste water discharge pipe (low and high temperature);
- rain water pipe;
- ventilation pipe.

The main advantages of the EasyKIT system are as follows:

- high and low temperature resistance;
- extremely easy and fast installation;
- installation does not require the use of special tools;
- flexibility and highly resistant to scratching and abrasion.

EasyFONO is the soundproof system for wastewater consisting of push-fit pipes, fittings and accessories, with a wide range of diameters DN32 to DN160, for pipes, and from DN32 to DN110 for fittings. Pipes and fittings are made of mix of polypropylene with mineral fillers to ensure a good soundproofing performance. It is certified SR EN 14366 according to the measurements made at Fraunhofer Institut für Bauphysik for the determination of acoustic performance.

Easy KIT

Easy FONO

RandomKIT represents a complete system, used for interior cold/hot water supply systems, heating systems.
Available diameters: between 20 and 110 mm.

PexKIT is a plastic piping system for hot and cold water installations and heating systems for houses, public and industrial buildings.

Application areas for PexKIT system:

- cold/hot water supply systems;
- radiating heating systems;
- floor or wall heating/cooling system and snow-melting.

Random KIT 

VALROM Pex KIT 

AquaPUR filtration systems are used in domestic applications with the ability to filter water mechanically, chemically and biologically, depending on the needs determined by specific analyzes.

The softening systems reduce water hardness eliminating the risk of limescale. Prevent the whitening of taps, sinks and sanitary items in contact with water and eliminate the risk of red and black stains on sanitary items. The drinking water is brought to the drinking parameters.

Starting with 2020, Valrom produces the following types of disposable masks certified ISO 9001:

- L90 Community face coverings (BFE>99% according to the European Standard EN 14683:2019+AC:2019. Product covered by the provisions of the European Commission CWA 17553:2020 - Community face covering)
- Medical face masks, type II R (according to the European Standard EN 14683:2019+AC:2019)
- Respiratory protective half-mask, type FFP (according to the European Standard EN 149:2001+A1:2009)
